Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

2. Claim 1-3, 4 and 9 are rejected under 35 U.S.C. § 102(e) as being anticipated by Fuller et al, U.S. Patent No. 5,752,191 (hereinafter Fuller).

Regarding claim 1, Fuller discloses a method for establishing a communication connection in a communication network between a person seeking communication (26) and a communication partner (subscriber to telephone control system) to whom a personal communication address is allocated (see abstract), the method comprising:

Art Unit: 2645

addressing the personal communication address of the communication partner (column 9);

allocating an individual identification code of at least one communication terminal to the personal communication address depending upon time (column 2);

reading out of a schedule store of the communication partner information about which individual identification code is allocated to the personal communication address of the communication partner at the time (column 15), the schedule store being administered by an appointments book program operated on a computer (1) that is connected to the communication network (2) by a gateway (4) and

establishing the communication connection to the at least one communication terminal (16,18,22,25,11,20) having the identification code.

Regarding claim 2, see column 2.

Regarding claim 3, see column 2.

Regarding claim 4, see columns 2 and 15.

Regarding claim 9, see Figure 1.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 8 is rejected under 35 U.S.C § 103(a) as being unpatentable over Fuller in view of the Publication "Parlay APIs 2.1 Connectivity Manager Class Diagrams" of June 26, 2000 (hereinafter Parlay).

Regarding claim 8, Fuller does not disclose a method wherein the computer and the communications network are connected via an interface operated in accordance with specifications of a Parlay Group. However Parlay discloses this method (see pages 4-15). Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Fuller with the method taught by Parlay. This modification allows for interfaces that are network independent as suggested by Fuller and Parlay.

Response to Arguments

5. Applicant's arguments have been considered but are deemed to be moot in view of the new grounds of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
